## Release Number: CB 17-42 M3-2 (17)-02

April 4, 2017 - The U.S. Census Bureau announces the February full report on manufacturers’ shipments, inventories and orders:

## Summary

New orders for manufactured goods in February, up seven of the last eight months, increased $\$ 4.8$ billion or 1.0 percent to $\$ 476.5$ billion, the U.S. Census Bureau reported today. This followed a 1.5 percent January increase. Shipments, up eleven of the last twelve months, increased $\$ 1.4$ billion or 0.3 percent to $\$ 480.0$ billion. This followed a 0.3 percent January increase. Unfilled orders, up following three consecutive monthly decreases, increased $\$ 0.1$ billion or virtually unchanged to $\$ 1,115.3$ billion. This followed a 0.3 percent January decrease. The unfilled orders-to-shipments ratio was 6.53 , down from 6.57 in January. Inventories, up seven of the last eight months, increased $\$ 1.2$ billion or 0.2 percent to $\$ 630.0$ billion. This followed a 0.3 percent January increase. The inventories-to-shipments ratio was 1.31 , unchanged from January.

## New Orders

New orders for manufactured durable goods in February, up two consecutive months, increased $\$ 4.2$ billion or 1.8 percent to $\$ 236.0$ billion, up from the previously published 1.7 percent increase. This followed a 2.4 percent January increase. Transportation equipment, also up two consecutive months, led the increase, \$3.4 billion or 4.4 percent to $\$ 80.5$ billion. New orders for manufactured nondurable goods increased $\$ 0.6$ billion or 0.2 percent to $\$ 240.5$ billion.

## Shipments

Shipments of manufactured durable goods in February, up three of the last four months, increased $\$ 0.8$ billion or 0.3 percent to $\$ 239.4$ billion, unchanged from the previously published increase. This followed a virtually unchanged January decrease. Machinery, also up three of the last four months, led the increase, $\$ 0.3$ billion or 1.1 percent to $\$ 31.2$ billion. Shipments of manufactured nondurable goods, up eleven of the last twelve months, increased $\$ 0.6$ billion or 0.2 percent to $\$ 240.5$ billion. This followed a 0.6 percent January increase. Chemical Products, up three of the last four months, drove the increase, \$0.7 billion or 1.1 percent to $\$ 68.7$ billion.

## Unfilled Orders

Unfilled orders for manufactured durable goods in February, up following three consecutive monthly decreases, increased $\$ 0.1$ billion or virtually unchanged to $\$ 1,115.3$ billion, up from the previously published virtually unchanged decrease. This followed a 0.3 percent January decrease. Computers and electronic products, up twenty-six consecutive months, drove the increase, $\$ 0.5$ billion or 0.4 percent to $\$ 132.2$ billion.

## Inventories

Inventories of manufactured durable goods in February, up three of the last four months, increased \$0.8 billion or 0.2 percent to $\$ 385.2$ billion, unchanged from the previously published increase. This followed a 0.1 percent January increase. Primary metals, up four consecutive months, led the increase, $\$ 0.2$ billion or 0.7 percent to $\$ 32.0$ billion. Inventories of manufactured nondurable goods, up six of the last seven months, increased $\$ 0.3$ billion or 0.1 percent to $\$ 244.8$ billion. This followed a 0.6 percent January increase. Petroleum and coal products, also up six of the last seven months, drove the increase, $\$ 0.5$ billion or 1.6 percent to $\$ 30.9$ billion. By stage of fabrication, February materials and supplies decreased 0.1 percent in durable goods and increased 0.5 percent in nondurable goods. Work in process increased 0.6 percent in durable goods and 0.1 percent in nondurable goods. Finished goods increased 0.1 percent in durable goods and decreased 0.1 percent in nondurable goods.

The Advance Report on durable goods for March is scheduled for release on April 27, 2017 at 8:30 a.m. EDT and the Full Report on May 4, 2017 at 10:00 a.m. EDT. View the full schedule in the Economic Briefing Room: <www.census.gov/economic-indicators/>. The full text and tables of this release can be found at <www.census.gov/m3>.

## EXPLANATORY NOTES

Figures in text are adjusted for seasonality, but not for inflation. Figures on new and unfilled orders exclude data for semiconductor manufacturing.
"Virtually unchanged" indicates that the change is less than 0.05 percent for a percent increase or decrease.

## Description of the survey

This report is compiled from results of the U.S. Census Bureau's Manufacturers' Shipments, Inventories, and Orders (M3) survey, which is a voluntary survey authorized by Title 13 of the United States Code. This survey provides statistics on a calendar-month basis for manufacturers' value of shipments, new orders (net of cancellations), end-of-month order backlog (unfilled orders), end-of-month total inventory (at current cost or market value), and inventories by stage of fabrication (materials and supplies, work-in-process, and finished goods). Data published from the M3 survey are based on a panel of approximately 4,800 reporting units that represent approximately 3,000 companies and provide an indication of month-to-month change for the Manufacturing Sector. These reporting units may be divisions of diversified large companies, large homogenous companies, or single-unit manufacturers in 92 industry categories, which are combined into 65 publication levels due to the small monthly panel size. The survey methodology assumes that the month-tomonth changes of the total operations of the reporting units in the M3 panel effectively represent the month-to-month movements of all establishments that make up the category. The companies for which shipments data are currently reported or imputed in the M3 survey represent approximately 61 percent of the total value of shipments for manufacturing establishments in the 2012 Economic Census, and these companies include almost two-thirds of the manufacturing companies with $\$ 500$ million or more in shipments in the 2012 Economic Census. The companies for which shipments data are currently reported in the M3 survey represent approximately 54 percent of the total value of shipments for manufacturing establishments in the 2012 Economic Census. Statistics based on the M3 panel differ from the results that would be obtained from a complete enumeration of all manufacturing companies. The M3 panel is not based on a probability sample; therefore, the sampling errors that are normally provided with sample surveys cannot be measured. Nonsampling errors are attributable to many sources. The use of company or divisional reports to estimate the monthly change for establishments is one source of nonsampling error. The use of primarily large companies to represent the month-to-month movement of all companies is another potential source. Any corrections will be published in the full report. Corrections received after the full report will be released in the next month's advance report. Any revisions made later than two months will be reflected in the annual benchmark publication. Additional survey documentation can be found on our web site:
<www.census.gov/manufacturing/m3/how_the_data_are_collected/index.html>.

## Benchmark notice

Revised historical data from the Manufacturers' Shipments, Inventories, and Orders (M3) Survey will be issued on May 18, 2017. These revisions result from:

- benchmarking the M3 shipments and inventories data to the 2015 Annual Survey of Manufactures (ASM) and revised 2014 ASM data on a 2012 NAICS basis;
- incorporating the unfilled orders to shipments ratios obtained from the 2015/2014 Manufacturers’ Unfilled Orders (M3UFO) Survey by applying these ratios to the respective ASM shipments data, as well as incorporating revised unfilled orders to shipments ratios for prior years by applying them to the respective ASM data;
- adjusting the new orders data to be consistent with the benchmarked shipments and unfilled orders data;
- correcting monthly data for late receipts, reclassifications of reported data, and revisions to previously reported data;
- updating the seasonally adjusted data based on the results of benchmarking and the recent annual review of the seasonal adjustment models.
These revisions will span the seasonally adjusted data for January 2002 through March 2017 and the data not seasonally adjusted for January 2007 through March 2017. An updated Press Release will contain revised monthly tables for January 2017 through March 2017. Please call M3 staff on (301) 763-4832 with any questions.

## America's Economy Mobile App

The America's Economy app provides real-time updates for 19 key economic indicators released from the Census Bureau, Bureau of Labor Statistics, and Bureau of Economic Analysis.
<www.census.gov/mobile/economy/>.

## API

The Census Bureau's application programming interface (API) lets developers create custom apps to reach new users and makes key demographic, socio-economic and housing statistics more accessible than ever before.

## ${ }^{\mathrm{p}}$ Preliminary

Revised data due to late receipts and concurrent seasonal adjustment
${ }^{1}$ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes
${ }^{2}$ Estimates and percent changes of shipments for the semiconductor industry are included in computers and electronic products, and all other applicable aggregate totals.
Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see [http://www.census.gov/manufacturing/m3/](http://www.census.gov/manufacturing/m3/).

${ }^{\mathrm{p}}$ Preliminary
$r$ Revised data due to late receipts and concurrent seasonal adjustment.
${ }^{1}$ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.
${ }^{2}$ Estimates of inventories for the semiconductor industry data are included in computers and electronic products, and all other applicable aggregate totals.
Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see
[http://www.census.gov/manufacturing/m3/](http://www.census.gov/manufacturing/m3/).

## ${ }^{\text {Not Applicable }}$

Preliminary
Revised data due to late receipts and concurrent seasonal adjustment.
Excludes the following industries with no unfilled orders: Wood products; nonmetallic mineral products; medical equipment and supplies; office supplies; other miscellaneous manufacturing; cuttery and handtols; farm and garden machinery; computer storage and
peripheral devices; audio and video equipment; manufacturing and reproducing magnetic and optical media; batteries; automobiles; light trucks and utility vehicles; heavy duty trucks; and miscellaneous furniture.
Unfilled orders to shipments ratio excludes semiconductor manufacturing
Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of
survey error is nonsampling error, which includes errors of coverage, response, and noneropting. Since the survey panel is not a provey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the sucy panel is not limitations see [http://www.census.gov/manufacturing/m3/](http://www.census.gov/manufacturing/m3/).

[^3]
[^0]:    ${ }^{\mathrm{p}}$ Preliminary
    ${ }^{r}$ Revised data due to late receipts and concurrent seasonal adjustment.
    ${ }^{1}$ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of
     as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.
    ${ }^{2}$ Data on unfilled orders are not available for the semiconductor industry. Estimates and percent changes for unfilled orders exclude semiconductor industry data.
    Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see [http://www.census.gov/manufacturing/m3/](http://www.census.gov/manufacturing/m3/).

[^1]:    ${ }^{x}$ Not Applicable
    ${ }^{\mathrm{p}}$ Preliminary
    ${ }^{\text {r }}$ Revised data due to late receipts and concurrent seasonal adjustment.
    ${ }^{1}$ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.
    ${ }^{2}$ Topical series are regroupings of the separate industry categories.
    Nondefense capital goods industries include: small arms and ordnance; farm machinery and equipment; construction machinery; mining, oil, and gas field machinery; industrial machinery; vending, laundry, and other
    machinery; photographic equipment; metalworking machinery; turbines and generators; other power transmission equipment; pumps and compressors; material handling equipment; all other machinery; electronic computers computer storage devices; other computer peripheral equipment; communications equipment; search and navigation equipment; electromedical, measuring, and control instruments; electrical equipment; other electrical equipment, appliances, and components; heavy duty trucks; aircraft; railroad rolling stock; ships and boats; office and institutional furniture; and medical equipment and supplies.
    ${ }^{4}$ Defense capital goods industries include: small arms and ordnance; communications equipment; aircraft; missiles, space vehicles, and parts; ships and boats; and search and navigation equipment.
    ${ }^{5}$ Estimates and percent changes exclude semiconductor industry data.
    ${ }^{6}$ Based on year-to-date for shipments and new orders, but on same month prior year for unfilled orders and inventories.
    Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a probability sample, estimates of sampling error cannot be calculated. For further details on survey design, methodology, and data limitations see

[^2]:    ${ }^{\mathrm{p}}$ Preliminary
    Revised data due to late receipts and concurrent seasonal adjustment.
    ${ }^{1}$ Estimates of shipments and new orders are for the duration of the period, while estimates of unfilled orders and total inventories are for the end of the period. Not seasonally adjusted estimates of shipments and new orders include adjusted data for non-calendar reporters. Seasonally adjusted estimates include concurrent adjustments for holiday and trading-day differences, where appropriate, as well as seasonal variation, based on the results of the latest annual review of the model parameters. Estimates are not adjusted for price changes.
    Note: Estimates of manufacturers' shipments, inventories and orders are subject to survey error and revision. One major component of survey error is nonsampling error, which includes errors of coverage, response, and nonreporting. Since the survey panel is not a a
