

## **Equipment Leasing and Finance Association's Survey of Economic Activity: Monthly Leasing and Finance Index**

*January New Business Volume Up 2 Percent Year-over-year*

Washington, DC, February 24, 2022—The [Equipment Leasing and Finance Association's \(ELFA\) Monthly Leasing and Finance Index \(MLFI-25\)](#), which reports economic activity from 25 companies representing a cross section of the \$900 billion equipment finance sector, showed their overall new business volume for January was \$8.3 billion, up 2 percent year-over-year from new business volume in January 2021. Volume was down 30 percent month-to-month from \$11.8 billion in December following the typical end-of-quarter, end-of-year spike in new business activity.

Receivables over 30 days were 1.8 percent, down from 2.0 percent the previous month and down from 2.2 percent in the same period in 2021. Charge-offs were 0.17 percent, down from 0.25 percent the previous month and down from 0.47 percent in the year-earlier period.

Credit approvals totaled 78.4 percent, down from 78.6 percent in December. Total headcount for equipment finance companies was down 11 percent year-over-year, a decrease due to significant downsizing at an MLFI reporting company.

Separately, the Equipment Leasing & Finance Foundation's Monthly Confidence Index (MCI-EFI) in February is 61.8, a decrease from 63.9 in January.

[ELFA President and CEO Ralph Petta](#) said, "Despite persistent supply chain disruptions in several collateral categories and nagging inflation, the equipment finance industry picks up in January where it left off last year: new business volume is robust and portfolios continue to perform. The impact of impending higher interest rates on industry performance in the coming weeks and months bears watching, however."

[Eric Gross, Chief Operating Officer, Dext Capital](#), said, "As we end February and look forward, we have conflicting pressures on the market. The pandemic subsiding and the prospect of a return to some sense of normalcy, as well as a robust backlog, raises optimism. These positives are countered with the ongoing supply chain disruptions, inflation, a rising interest rate environment and international tensions. With that said, overall, we think the headwinds are manageable and are bullish on market growth through 2022."

### **About ELFA's MLFI-25**

The MLFI-25 is the only index that reflects capex, or the volume of commercial equipment financed in the U.S. The MLFI-25 is released globally at 8 a.m. Eastern time from Washington, D.C., each month on the day before the U.S. Department of Commerce releases the [durable goods report](#). The MLFI-25 is a financial indicator that complements the durable goods report and other economic indexes, including the [Institute for Supply Management Index](#), which reports economic activity in the manufacturing sector. Together with the MLFI-25 these reports provide a complete view of the status of productive assets in the U.S. economy: equipment produced, acquired and financed.

The MLFI-25 is a time series that reflects two years of business activity for the 25 companies currently participating in the survey. The latest MLFI-25, including methodology and participants, is available at [www.elfaonline.org/Data/MLFI/](http://www.elfaonline.org/Data/MLFI/).

## **MLFI-25 Methodology**

ELFA produces the MLFI-25 survey to help member organizations achieve competitive advantage by providing them with leading-edge research and benchmarking information to support strategic business decision making.

The MLFI-25 is a barometer of the trends in U.S. capital equipment investment. Five components are included in the survey: new business volume (originations), aging of receivables, charge-offs, credit approval ratios, (approved vs. submitted) and headcount for the equipment finance business.

The MLFI-25 measures monthly commercial equipment lease and loan activity as reported by participating ELFA member equipment finance companies representing a cross section of the equipment finance sector, including small ticket, middle-market, large ticket, bank, captive and independent leasing and finance companies. Based on hard survey data, the responses mirror the economic activity of the broader equipment finance sector and current business conditions nationally.

## **About ELFA**

The Equipment Leasing and Finance Association (ELFA) is the trade association that represents companies in the nearly \$1 trillion equipment finance sector, which includes financial services companies and manufacturers engaged in financing capital goods. ELFA members are the driving force behind the growth in the commercial equipment finance market and contribute to capital formation in the U.S. and abroad. Its 580 members include independent and captive leasing and finance companies, banks, financial services corporations, broker/packageers and investment banks, as well as manufacturers and service providers. In 2021, ELFA is celebrating 60 years of equipping business for success. For more information, please visit [www.elfaonline.org](http://www.elfaonline.org).
